Strategy Process and Description

Anchor's investment philosophy is bottom-up and value-oriented. Initially a broad universe is screened using different valuation criteria: low valuation (low P/E, P/CF, etc.), high dividend yield or dividend growth, and a discount to private market value. Analysts then do fundamental research to develop the value thesis and identify a trigger for the recognition of value. Anchor strives for its portfolios to have a higher yield, lower P/E and higher growth than comparable indices such as the Russell 1000 Value. The firm's Investment Committee approves all new stocks prior to inclusion in the portfolio. Stocks are sold if the fundamentals deteriorate, if they reach our price objective, or if a more attractive investment is found. The fixed income portion of a balanced portfolio involves the active management of both issue selection and maturity positioning, for maximum return and minimum risk. Only investment-grade bonds are considered.

Investment performance statistics: Anchor Capital Balanced Composite, for the period from January 1, 2007 through December 31, 2018

FIRM DEFINITION: Anchor Capital Advisors LLC is a Registered Investment Advisor and operates through three divisions: Anchor Managed Accounts division, Anchor Institutional division and the Anchor Private Client division. The Anchor Capital Managed Account division also serves as an investment sub-advisor to Unified Managed Account (UMA) Programs sponsored by brokerage firms, banks and other organizations. Through the UMA program, Anchor Capital provides a model portfolio for each discipline which has been chosen by the UMA sponsor. For GIPS® purposes, the firm is defined as the Institutional and Private Client Investment Management divisions of Anchor Capital. On June 1, 2006 Boston Private Financial Holdings, a holding company, purchased an 80% equity interest in Anchor Capital Advisors LLC. The company's employees continue to retain a 20% interest. The firm specializes in managing equity, balanced, and fixed income portfolios for institutional and individual clients.

DESCRIPTION OF ACCOUNT INVESTMENT OBJECTIVE: The performance results displayed herein represent the performance of the Balanced Composite managed by Anchor Capital Advisors LLC. The Balanced Composite was created on June 30, 1983. For all years between 1983 and 2012, the composite includes all non-taxable discretionary accounts with assets exceeding \$250,000. Effective 1/1/2013 the composite criteria were changed to include taxable accounts. All accounts were invested in equities and fixed income. The investment objective for this composite is to achieve a high rate of return through the purchase of equities and fixed income.

CALCULATION OF RATES OF RETURN: All securities are valued at last sale price as provided by pricing services. The portfolio valuation is based on a trade date basis net of commissions. Investment returns include the reinvestment of income. The accrual of interest income is added to the beginning and ending market value. Effective on 1/1/2010, dividends (excluding income on money market securities) are credited on an accrual basis. The currency used to express performance is the U.S. dollar. The time-weighted returns are calculated on an average-weighted basis for each monthly period in the preceding quarter. Anchor revalues portfolio market values on the date of a large capital flow, defined as at least 10% of the portfolio value. Quarterly composite results are linked to determine annual returns. The Russell Indices exclude fees and commissions. Returns of individual clients' accounts may differ from composite returns because of different investment objectives, different tax status and other considerations. Returns of individual clients' accounts will be reduced by investment advisor's fees, custodial service fees (if any) and other expenses which might be incurred to provide investment management, custody, administrative, actuarial, accounting or other services to the client. Investment advisory fees charged by Anchor Capital Advisors are described in Part 2A of Form ADV, and a document with all information contained in that filing is provided to all of Anchor Capital Advisors' clients. Prior to 1/1/2013 gross returns are calculated before management fees and custodial fees, but after transaction costs. Effective 1/1/2013 the gross returns are presented as pure gross and are calculated before management fees, custodial fees and transactions costs. Net returns are calculated before custodial fees, but after management fees and transaction costs. Net returns are calculated using actual fees. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request.

DISPERSION METHOD: Internal dispersion is calculated using the equal-weighted standard deviation of all portfolios included in the composite for the entire year.

GLOBAL INVESTMENT PERFORMANCE STANDARDS COMPLIANCE (GIPS®): In compliance with GIPS®, Anchor Capital Advisors LLC Institutional and Private Client Investment Management divisions prepare statistics for the Balanced Composite (on a quarterly basis) which includes total dollars represented in the accounts included in that composite at the end of the quarter, the number of accounts represented in the composite which share comparable investment guidelines and risks, the number of client accounts in that composite, the average account size and median account size. These data are available upon request. The table on the next page contains extracts of these data as of the most recent reporting period. The inclusion policy for new accounts is to add each account to the composite as of the last day of the month of the first full calendar quarter in which the account was fully invested. If an account has an objective change, it will be removed from the existing composite as of the first of the month in which the objective change occurred, and will be added to a new composite as of the last day of the month of the first full calendar quarter in which the account was fully invested and managed to the new objective. Closed accounts are removed from composites as of the first of the month in which the account closed. Portfolios below \$250,000 and portfolios with restrictions are excluded from the Balanced Composite. If a portfolio falls below \$200,000 due to client withdrawals or market fluctuations in any given month, it will be excluded from the composite as of the beginning of that month.

GIPS® COMPLIANCE & VERIFICATION STATEMENT: Anchor Capital Advisors LLC Institutional and Private Client Investment Management divisions ("The GIPS® Firm") claim compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS® standards. The GIPS® Firm has been independently verified for the periods 1994 through 2017 as follows: 1994-2000: Brown & Brown PC; 2001-2003: Miller Wachman LLP; 2004-2017: ACA Performance Services (formerly Beacon Verification Services). The verification reports are available upon request. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS® standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS® standards. Verification does not ensure the accuracy of any specific composite presentation.

BENCHMARK DESCRIPTION: Information about indices is provided to allow for comparison of the performance of the Adviser to that of certain well-known and widely recognized indices. There is no representation that such index is an appropriate benchmark for such comparison. You cannot invest directly in an index, which also does not take into account trading commissions and costs. The volatility of indices may be materially different from the performance of the Adviser. In addition, the Adviser's recommendations may differ significantly from the securities that comprise the indices. The primary benchmark is a static blend of 60% Russell 1000 Value Index; 30% Barclays Capital U.S. Government/Credit Intermediate Bond Index; 10% Citigroup 90-Day Treasury Bill Index. The Russell 1000 Value Index measures the performance of the large-cap value segment of the U.S. equity universe. It includes those Russell 1000 Index companies with lower price-to-book ratios and lower expected growth values. The Russell 1000 Value Index is constructed to provide a comprehensive and unbiased barometer for the large-cap value segment. The Index is completely reconstituted annually to ensure new and growing equities are included and that the represented companies continue to reflect value characteristics. The Barclays Capital U.S. Intermediate Government/Credit Bond Index measures the performance of U.S. dollar denominated U.S. Treasuries, government-related and investment grade U.S. corporate securities that have a remaining maturity of greater than or equal to 1 year and less than 10 years. Securities have \$250 million or more of outstanding face value and must be fixed rate and non-convertible. The Citigroup 90-Day Treasury Bill Index measures the average return of the last three-month U.S. Treasury Bill issues. U.S. Treasury Bills are short-term securities issued by the U.S. government with maturities of up to one year. They are backed by the faith and credit of the U.S. government who guarantees full payment of principal and interest at maturity. Total return comprises price appreciation/depreciation and income as a percentage of the original investment. All benchmark returns include the reinvestment of income. The benchmark is recalculated quarterly by allocating the stated percentage of each constituent benchmark.

¹Assets Under Advisement represent non-discretionary/UMA assets.

²Effective 1/1/2013 the gross of fee returns are presented pure gross and are calculated before management fees, custodial fees and transaction costs. Pure gross returns are presented as supplemental information to the GIPS compliant presentation. Past performance is not guarantee of future results. Inherent in any investment is the possibility of loss.

³Percentages stated are based on the equity portion of the portfolio. This is provided to supplement the investment return information. The portfolio holdings information presented do not include various non-material positions held in specific individual portfolios. The listing of particular securities should not be considered a recommendation to purchase or sell those securities. While these securities may have been among Anchor Capital's Small Cap Value holdings at the time this material was assembled, recommendations will change over time. There can be no assurance that the securities remain in the portfolio or that other securities have not been purchased. It should not be assumed that recommendations made in the future will be profitable or will equal the performance of the securities presently in the portfolio. Individual clients' portfolios may vary.

⁴Anchor Capital Advisors' standard fee schedule for the Institutional Investment Management division is 1% on the first \$15,000,000 in assets; 0.75% on the next \$25,000,000 in assets; and 0.60% on additional assets. Bundled brokerage fees, where applicable, include transaction fees, custodial and various consulting services.

*As of 9/1/18 the Median P/E (LTM) was changed to Weighted Average P/E (LTM) to more accurately represent industry standards.
